MiC TALENT SOLUTIONS

MiC Talent Solutions is in a niche market working solely within the cybersecurity industry and provides recruiting, direct hire, apprenticeships, augmented staff, and professional service contracting solutions for organizations searching for minority, women, and non-binary cybersecurity talent. MiC Talent Solutions works with business owners, corporations, diversity, equity, and inclusion (DEI) program owners, supplier diversity directors, human resources directors, hiring managers, Chief Information Security Officers (CISOs), presidents, and CEOs looking to increase the representation of minorities, women, and non-binary cybersecurity talent in their organization. Specifically, we take a multi-pronged approach to solving the talent gap that exists in the cybersecurity profession by sourcing from historically underrepresented groups and providing them with technical training and leadership development opportunities, creating a pipeline of holistic cybersecurity professionals from entry to executive level.
